dSPACE Simulator Mid-Size Load Card Labels

Purpose

This PDF file serves as a template for creating labels for load cards of dSPACE Simulator Mid-Size.

The template has editable fields for each signal name. The fields have the standard signal names by default.

You can replace them by your own signal names.

File location

`MidSize2211LoadCardLabels.pdf is installed in %dSPACE_ROOT%\Doc\Print\`

Method

1 Open the PDF file in the Acrobat Reader.

2 Fill in your signal names in the editable fields.

3 Click **File - Save a Copy** to save the file under another name.

4 Click **File - Print** to open the **Print** dialog.

5 Select **Print Rage - Pages** and enter `2`.

6 Set **Page Handling - Page Scaling** to `None` to get the correct size.

7 Insert an adhesive foil in your printer and click **Ok**.

8 Cut out the labels for each load card and stick them on the load cards.
